Dot Plot of Top KEGG Enriched Pathways in WT 2 vs WT 1 Differential Expression Analysis
activated
suppressed
Hedgehog signaling pathway
Notch signaling pathway
Longevity regulating pathway − multiple species
Leishmaniasis
Staphylococcus aureus infection
Endocrine resistance
Morphine addiction
Estrogen signaling pathway
Parathyroid hormone synthesis, secretion and action
Tuberculosis
Phagosome
Complement and coagulation cascades
cAMP signaling pathway
Osteoclast differentiation
Coronavirus disease − COVID−19
Lysosome
Systemic lupus erythematosus
Neutrophil extracellular trap formation
Signaling pathways regulating pluripotency of stem cells
Breast cancer
