cellular developmental process
anatomical structure development
cell death
response to stress
cell communication
regulation of biological process
cellular response to stimulus
establishment of localization
cell differentiation
multicellular organism development
anatomical structure morphogenesis
programmed cell death
response to wounding
regulation of cellular process
transport
system development
anatomical structure formation involved in morphogenesis
apoptotic process
signal transduction
neurotransmitter transport
nervous system development
syncytium formation
apoptotic signaling pathway
intracellular signal transduction
neurogenesis
inositol lipid−mediated signaling
intrinsic apoptotic signaling pathway
signal transduction by p53 class mediator
gliogenesis
phosphatidylinositol−mediated signaling
intrinsic apoptotic signaling pathway by p53 class mediator
glial cell differentiation
phosphatidylinositol 3−kinase signaling
