metabolic process
biological regulation
cellular process
regulation of biological process
primary metabolic process
biosynthetic process
cellular metabolic process
organic substance metabolic process
nitrogen compound metabolic process
cellular component organization or biogenesis
cellular aromatic compound metabolic process
heterocycle metabolic process
regulation of metabolic process
cellular biosynthetic process
macromolecule metabolic process
regulation of cellular process
organonitrogen compound metabolic process
cellular component biogenesis
organic substance biosynthetic process
cellular nitrogen compound metabolic process
organic cyclic compound metabolic process
cellular macromolecule metabolic process
regulation of nitrogen compound metabolic process
regulation of macromolecule metabolic process
regulation of primary metabolic process
cellular nitrogen compound biosynthetic process
organonitrogen compound biosynthetic process
ribonucleoprotein complex biogenesis
regulation of biosynthetic process
macromolecule biosynthetic process
protein metabolic process
regulation of cellular metabolic process
gene expression
cellular amide metabolic process
nucleobase−containing compound metabolic process
regulation of cellular biosynthetic process
regulation of gene expression
cellular macromolecule biosynthetic process
amide biosynthetic process
ribosome biogenesis
regulation of cellular amide metabolic process
regulation of macromolecule biosynthetic process
regulation of protein metabolic process
cellular protein metabolic process
peptide metabolic process
nucleic acid metabolic process
regulation of cellular macromolecule biosynthetic process
regulation of cellular protein metabolic process
RNA metabolic process
posttranscriptional regulation of gene expression
peptide biosynthetic process
translation
mRNA metabolic process
ncRNA metabolic process
RNA processing
regulation of translation
mRNA processing
ncRNA processing
RNA splicing
